

AUGMENTIX

Rugged Redefined.®

Augmentix Corporation is a provider of innovative rugged computing solutions for mission-critical applications in environmentally challenging conditions. Augmentix strives to redefine and expand the expectations of the rugged industry by working with tier-one providers to re-engineer and ruggedize mainstream products to provide solutions that set new usability standards – with advanced technologies, extreme performance, enhanced functionality, reliability, and the potential for a low total cost of ownership.

Its innovative business model allows Augmentix and third parties to challenge traditional rugged providers, while providing customers the potential for more efficient, cost-effective IT deployments, management and maintenance, and lower product lifecycle costs.

Augmentix is headquartered in Austin, Texas and is wholly owned by Entorian Technologies Inc. (NASDAQ: ENTN).

PARTNERS AND SUPPLIERS

The Augmentix business model hinges on collaboration with key third parties. By combining resources and expertise, a synergy is created that translates into superb value for customers.

- Dell
- Havis
- Samsung
- DuPont
- Sanyo
- Solvay Advanced Polymers

TARGET MARKETS

As the needs of rugged customers continue to expand, the technology they employ must keep pace. Augmentix has recognized their needs and continues to pursue innovations that address the ever-changing demands of rugged customers in vertical markets, including:

- Military
- Public Safety
- Field Service
- Industrial / Manufacturing
- Inventory / Warehousing
- Healthcare
- Education
- Oil and Gas
- Automotive
- Transportation

OUR MISSION

Maximize customer value by delivering advanced computing performance and rugged technologies that protect and secure our customers' investments, based on a common IT platform.

OUR VISION

Redefine rugged computing for customers and become the leader in ruggedized and secure computing solutions.

AUGMENTIX TECHNOLOGIES

The key differentiator for Augmentix is a toolbox of advanced technologies that provides the potential for enhanced system uptime in extreme environments. Augmentix has earned its reputation as a provider of rugged, reliable computing solutions with a strong technology portfolio. Our growing list of innovative technologies includes:

Technologies for Mobile Devices:

- **Ballistic Armor™ Protection**
An integrated system of key technologies and designs that ruggedizes and protects the device in extreme environments.
- **PR-481™ Ultra-Performance Chassis Material**
An innovative chassis material that provides strength beyond traditional Magnesium Alloy material.
- **PrimoSeal™ Sealing Technology**
A set of unique gasket designs that seal and protect the system from the ingress of foreign substances.
- **QuadCool® Thermal Management System**
A sealed thermal chamber that keeps the system cool while enabling extreme performance.

Technologies for Servers and Workstations:

- **Armored Protection System™**
A proven ruggedization process comprised of unique engineering designs, advanced construction materials, and independent, third-party environmental testing.
- **A+SAMP Intelligent Server Management System™**
An embedded, single board computer that resides inside the server and can be programmed to monitor the server, providing highly secure reporting and alerts on system health.
- **A+ Thermal Management**
- **A+ Shock & Vibration Packaging**
- **A+ Contamination Filtration System**

PRODUCTS AND SOLUTIONS

The Augmentix portfolio includes a range of products and solutions designed to meet the needs of vertical market applications. Our growing list of products and solutions includes:

Third-Party Products and Solutions

Augmentix brings its rugged expertise select third-party products by providing assets such as engineering, manufacturing, marketing and sales support, and logistics. Augmentix has collaborated on various products and solutions including:

- **Dell™ Latitude™ XFR Fully Rugged Notebooks**

Find out more at www.dell.com/xfr.

- **The Docking Solution Center (DSC)**

A one-stop resource for rugged and mobile vehicle laptop docking solutions. The DSC is an Augmentix service created in collaboration with Havis.

Find out more at www.theDSConline.com.

A+ Servers

Augmentix® A+ Servers are re-engineered and ruggedized from Dell PowerEdge™ servers for customers who demand greater durability and heightened server management in rack-dense and transit-case applications. These servers are designed to withstand extreme temperatures, contaminants, shock and vibrations while providing commonality with mainstream PowerEdge servers.

- **A+R200 IU Rugged Server**
- **A+SAMP Intelligent Server Management**

See “Augmentix Technologies” section

KEY CUSTOMERS

Augmentix works with third parties to meet the needs of a growing and diverse customer base, including:

Military / Homeland Security

- United States Marine Corps
- United States Air Force
- United States Navy
- United States Army
- United States Coast Guard
- Air National Guard

Public Safety

- Georgia Department of Transportation
- North Carolina Department of Public Safety

Industrial

- Caterpillar
- The Boeing Company
- Halliburton
